Dear Mr. Thakkar,

I would like to apply for the internship position at your company. My academic goals, passion for programming, and outstanding leadership skills make me an excellent fit for this position.

I have over five years of experience in coding and I'm proficient in Scratch, C++, Python, HTML, CSS, JS, Java and p5.js. Some of my side-projects include simple games with Scratch and p5.js, detecting blindspot sensors in vehicles using C++ and Arduino, stunt tester using Python and Raspberry Pi, and responsive and personal websites using HTML, CSS, and JS, etc.

I have interned as a database administrator at RS Tec Systems to develop a resume parser using Flask and Machine Learning. As a full-stack developer, I have developed a parent engagement website for Iroquois Ridge High School using React and Strapi. Additionally, I have also competed at the Bay Area Science Fair and have won a multitude of scholarships and a silver medal for my science project whereby I utilized UV light to safely reuse masks with an Arduino.

I volunteered as a Leader in Training at McMaster University's Venture Academy program assisting in STEM camps. These experiences have fostered my love for computer programming. I believe that my passion for computing, my history of working collaboratively to achieve great results, good communication skills, adaptability, empathy and patience will help to bring out the best in me. I am confident this position would be an excellent way for me to put my education into practice.

I am enthusiastic about joining your organization as an intern. I have enclosed a copy of my resume for your perusal and look forward to discussing my application with you at an interview.

Thank you for your time and consideration.

Sincerely,

Aahan Ghode
